(54) INFORMATION TRANSFER METHOD, INFORMATION TRANSFER SYSTEM AND
INFORMATION TRANSFER DEVICE, INFORMATION RECEPTION TERMINAL EQUIPMENT USED THEREFOR

(57)Abstract:

PURPOSE: To provide the information transmission system in which desired information is received by other terminal equipment than a terminal equipment of a request source.

CONSTITUTION: The user uses a telephone set 3-1 or a personal computer 3-2 to call a desired information service center such as an information service center A for a prompt stock report. The information service center A replies it to use a synthesized voice of a voice reply device for a phone call and to use directly a computer output of a central processing unit for the personal computer thereby making a guidance. For example, 'Which company of stocks do you want?', 'What is your notice condition?' and 'Where the information should be sent?'; The user makes a reply respectively to the guidance. For example, 'stocks of ×× company' as a reply 1, 'When the stock reaches a price of 1000Yen or over' as a reply 2 and 'ID number 123456', that is a reception exclusive terminal owned by the user as a reply 3. The information service center retrieves a database with AND gate condition between the replies 1, 2 while updating the database secularly and detects the information satisfying the retrieval condition and sends the information to a transmission destination shown in the reply 3.
